PROFILE

I am a passionate junior software developer, freshly graduated from the School of Code Bootcamp.
I am excited to join a software development team and apply my new skills to real-world projects.
With a strong drive for problem-solving and a commitment to continuous learning, I'm eager to collaborate with fellow professionals to create innovative software solutions.

SKILLS

JavaScript   Python   Git / GitHub   HTML   CSS   UI / UX   Jest

Playwright   React.js   React Testing Library   Node.js   Express

REST API   PostgreSQL

PERSONAL PROJECTS

Breezy Online Planner
- Online at: **https://breezyonlineplanner.netlify.app**
- GitHub repository: **https://github.com/bianca-g-b/TaskManager**

- Full-stack task manager app
- Main tech stack: React.js, Node.js, express, supabase

PROFESSIONAL EXPERIENCE

Trainee Full Stack Software Developer   03/2023 – 07/2023
School of Code - Remote, UK
- 16 week intensive Bootcamp in Full Stack Software Development.
- Covered the fundamentals of programming, how to collaborate in a high performance tech team and how to work to industry best practices and standards.
- Engaged with front-end and back-end technologies, including JavaScript, React.js, CSS, HTML and Node.js, employing these tools to develop robust and responsive applications.
- Weekly hackathons to implement the topics covered in the week, using Agile methodologies.

PROJECTS

The Ctrl Freaks Team
Wise Wallet Kitchen - *Full Stack App built in 5 weeks following Agile principles*
- An app that will help people with the rising costs of food prices
- Tech Stack: JavaScript, React, CSS, JSON, Supabase, Figma, Jest
- Official Website: https://wisewalletkitchen.netlify.app/

Codetta Stone Team
ONE WEEK PROJECT - Building an app in React that will help students with their learning
- The project was a collaborative effort where each member of the team made significant contributions
- Designed a quiz app to assist fellow bootcampers with testing their coding skills
- Prioritised the Agile way of working, so we decided to be flexible and make changes if necessary and used tools such as Trello boards and Figma to keep track of our progress
- One of my personal contributions was successfully integrating routing functionality into our application. After thorough research, I discovered the 'react-router-dom' package as the ideal solution. Through trial and error, I efficiently implemented the routing system, enabling navigation between different components.

Customer Service Advisor   05/2022 – 02/2023
Santander, UK
- Worked in the Business Banking and Financial Support departments.
- Developed a deep understanding of business banking products, services, and policies, effectively communicating complex information to clients in a clear and concise manner. Utilised active listening skills to empathetically understand client needs, addressing concerns promptly and providing appropriate solutions.
- Handled sensitive customer information and financial data with confidentiality and adhered to strict security protocols, ensuring the privacy and protection of customer accounts and transactions.

Customer Service Advisor   11/2019 – 11/2021
Classic Shoe Repairs - London, UK
- Dealing with customer enquiries, orders and quality control. Resolving any issues efficiently and professionally.
- Creating, updating and maintaining records in the company's bespoke computerised system; ensuring the administrative systems are always understood and adhered to, following the appropriate operational guidelines.
- Providing assistance to corporate clients and private customers either face to face, via telephone or by email
- Making sure all incoming post is recorded in the system; preparing outgoing postal deliveries and relevant support documents.

Theatre Performer / Actor   2010 – 2019
UK and Romania
- Collaborated with ensembles of performers, directors, and production teams, fostering effective teamwork and cooperation to deliver successful productions.
- Adapted to unexpected changes during live performances and exhibited adaptability and resilience in coping with demanding schedules and the pressures of the shows.
- Used analytical and research skills to analyse scripts and plays, creating character profiles and narratives.
- Developed characters by incorporating personal insights, enhancing the depth and authenticity of performances.

EDUCATION

Bachelor of Arts - Acting Studies

2007 – 2010 | Iasi, Romania

George Enescu National University of Arts, Faculty of Theatre ↗

INTERESTS AND HOBBIES

I recently started attending Tech meetups, such as React Advanced London. It's a great opportunity for networking and meeting people in the industry, and I'm planning to doing that on a regular basis.

In my spare time, I like exploring new places, walks in nature, cooking foods from scratch or growing plants.

To relax, I sometimes engage in arts and crafts activities, such as up-cycling small pieces of furniture or painting plant pots.

I also enjoy watching art-house films, documentaries, reading fiction and non-fiction and visiting art museums.
